

# COUP D'ETAT

**Casiopea Mirror**  
*by Agrippa*  
*Contemporary*  
Spain

Casiopea Mirror's concept is repeated on a concentric basis creating an elliptic-kinetic effect that portrays (as an idealized caricature) the kinetics of the stellar orbits. In spite of the apparent bidimensionality of its three rings it is especially interesting the different sections along its profiles, since these vary three-dimension ally which enhances the dynamism of its curves.

Dimensions: 63" W x 2.75" D x 32.5" H
