

# COUP D'ETAT

## **Furry Gamma Table** *by Daniel Shapiro*

*Contemporary*

United States

The Furry Gamma Table is hand built in Shapiro's studio with California Stoneware. It stands nearly 24" tall and is the perfect size table to accompany a couch or chair. At first glance the table appears to be covered in a soft hair texture, upon further inspection it's revealed the hair texture is actually made of clay. This illusion is achieved by a unique proprietary technique developed by Shapiro.

**Dimensions:** 20 Dia. x 23.25" H

**Materials:** Stoneware

**Item Number:** TS-DS-FRR-GMM

**Price Upon Request**

**Please Note:** The Furry Gamma table is available in various finishes and custom sizes and is open for commission.
