

Trim
by Barovier&Toso

Contemporary
Italy

The collection builds on the archive of large installations made by Barovier&Toso in the 1960s and 1970s, multiplying and repeating modular elements, simple or polyhedral, smooth or enhanced by traditional Murano workmanship. The hexagonal tube made with the age-old “ice” technique generates spherical volumes that fit perfectly into the architecture of spaces, almost becoming its extension. According to your own creativity, the position of the modules can be customized during installation into a symmetrical and conventional order or into a messy shape.
